EDUCATION

KIT - Kalaignarkarunanidhi Institute of Technology, Coimbatore 2024 – 2028
B.E. Computer Science and Engineering **Current CGPA: 7.91/10.0**
Coursework: Data Structures, DBMS, Operating Systems, OOP, Computer Networks, DAA

EXPERIENCE

Web Development Intern, Appin Technology, Coimbatore

- Completed one-month internship building responsive web pages.
- Worked with HTML, CSS, JavaScript and basic backend integration.
- Improved debugging, UI design and project deployment skills.

PROJECTS

Loan Approval Prediction Using Machine Learning | Python, Scikit-learn, Pandas, NumPy, Machine Learning Link

- Built a machine learning model to predict loan approval outcomes based on applicant financial data, including income, credit history, loan amount and employment status.
- Implemented data preprocessing and feature engineering, including handling missing values, encoding categorical variables and scaling numerical features.
- Trained and compared multiple classification algorithms (Logistic Regression, Decision Tree, Random Forest) and tuned hyperparameters to achieve accurate predictions.
- Evaluated model performance using accuracy, precision, recall and confusion matrix to select the best-performing model.

Book Recommendation System | Python, Machine Learning, Pandas, NumPy Link

- Built a book recommendation engine that suggests titles to users based on reading history and content similarity.
- Applied collaborative and content-based filtering techniques to generate personalized recommendations.
- Processed and cleaned large book rating datasets to improve recommendation accuracy and relevance.

Smart Traffic Management System | Python, OpenCV, Machine Learning, IoT Link

- Designed an intelligent traffic management system using computer vision and ML algorithms to optimize traffic signal timing and reduce congestion in real time.
- Used OpenCV to process live video feeds from traffic cameras and detect and count vehicles at intersections.
- Built a machine learning model to dynamically adjust signal timings based on real-time traffic density rather than fixed intervals.
- Integrated IoT sensors to collect supplementary traffic data, improving the accuracy and responsiveness of signal control decisions.

TECHNICAL SKILLS

Java	DBMS	C++	HTML
Python	OOPS	DSA	CSS
C	Git	MongoDB	JavaScript
SQL	GitHub	Node.js	

CERTIFICATIONS & COURSES

NPTEL – Prog. in Java (Elite + Silver)	Link
Deloitte – Data Analytics Job Sim.	Link
Infosys – Software Engineering	Link
CCNA – Introduction to Networks	Link

COMPETITIVE PROGRAMMING

LeetCode: Solved Problems: 353 | Badge: 1 (50 Days Badge 2026) | Contest Rating: 1309 | Global Rank: 849,194 / 881,221 | Top 96.42%
CodeChef: Solved Problems: 1081 | Max Rating: 1051 | Current Rating: 1051 (1★) | DSA Rating: 1355 (Highest: 1384) | Contests Attended: 45 | Global Rank: 127,400
Codeforces: Max Rating: 695
HackerRank: 2 Skill Badges (C++, Java) | Active Programming Profile
GeeksforGeeks: Score 47 | 33 solved | Institute Rank 285
Overall (Codolio): 1490 questions solved | 214 active days | 71 contests attended

ACHIEVEMENTS

- Participated in numerous online hackathons.
- Active GitHub contributor with multiple academic and personal projects.
- Continuously improving problem-solving through competitive programming platforms.
